## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election without traverse of Group I, claims 1-20 in the reply filed on 11 March 2005 is acknowledged. Claims 21-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 10-12 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Oberg et al. Oberg et al discloses a wheel holding device including an attachment section formed by clamp 70 including opposing U-shaped sections 72 engaging the seatpost of a bicycle, and arms including dropouts 62 as claimed.

4. Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Lin '345. Lin '345 discloses a seatpost attachment mechanism 20, 45 which does not include a clamp. Lin '345 also discloses an attachment mechanism, i.e. a bag 40 coupled with the seatpost attachment mechanism. The bag 40 of Lin '345 is considered adapted or capable of holding a bicycle wheel of approximately the same size as the bag, i.e. no distinction is seen between the claimed device and the device of Lin '345 as a result of the intended use of the device to hold a bicycle wheel.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oberg et al in view of Shim. Oberg et al discloses all structure of the claimed device except a protective covering on the U-shaped sections. Shim teaches that it is known to make the U-shaped sections of a clamp with a protective covering. It would have been obvious to make the U-shaped sections in Oberg et al with a protective covering as taught by Shim to protect the seatpost from damage.

***Allowable Subject Matter***

7. Claims 1-9 are allowed.

8. Claims 15, 17, 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The remaining cited prior art is illustrative of the general state of the art.
